#### HDFC Diversified Equity All Cap Active FOF

(An Open-ended Fund of Fund Scheme investing in units of domestic equity-oriented schemes based on varied market caps) is suitable for investors who are seeking\*:

- Capital appreciation / generate income over long term
- To invest in units of Equity-oriented schemes based on varied market caps

\*Investors should consult their financial advisers, if in doubt about whether the product is suitable for them. #The product labeling assigned during the NFO is based on internal assessment of the scheme characteristics or model portfolio and the same may vary post NFO when the actual investments are made. For latest riskometer, investors may refer to the Monthly Portfolios disclosed on the website of the Fund viz. [www.hdfcfund.com](http://www.hdfcfund.com)

Investors in the Scheme shall bear the recurring expenses of the Scheme in addition to the expenses of other schemes in which this Fund of Funds scheme makes investment (subject to regulatory limits).

**MUTUAL FUND INVESTMENTS ARE SUBJECT TO MARKET RISKS, READ ALL SCHEME RELATED DOCUMENTS CAREFULLY.**

**Mission: To be the wealth creator for every Indian**

**Vision: To be the most respected asset manager in the world**

## GLOSSARY

### Sharpe Ratio

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

### Beta

Beta ( $\beta$ ) of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measures the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

### Standard Deviation

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

### Risk Free Return

The theoretical rate of return of an investment with safest (zero risk) investment in a country

### Total Expense Ratio

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

### Tracking Error

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

### Residual Maturity

Weighted Residual Maturity of the securities in scheme.

### Portfolio Yield (Yield To Maturity)

Weighted average yield of the securities in scheme portfolio.

### Portfolio Turnover Ratio

Portfolio Turnover Ratio is the percentage of a fund's holdings that have changed in a given year. This ratio measures the fund's trading activity, which is computed by taking the lesser of purchases or sales and dividing by average monthly net assets.

### Modified Duration

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

### Macaulay Duration (Duration)

Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years/days. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero-coupon securities where they are the same.

## HOW TO READ FACTSHEET

### Fund Manager

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

### Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme.

### Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

### Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

### SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

### NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

### Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the NIFTY, SENSEX, BSE200, BSE500, 10-Year Gsec.

### IDCW Option

In line with applicable SEBI guidelines, with effect from April 1, 2021, the name of "Dividend Option" under the Schemes stand revised as "Income Distribution cum Capital Withdrawal (IDCW) Option". IDCW Option may offer Payout and Reinvestment Sub-options / facilities.

**Investors may note that the amounts can be distributed out of investor's capital (Equalization Reserve), which is part of sale price that represents realized gains.**

### Dividend / IDCW

"Dividend" / "IDCW" means income distributed on Mutual Fund Units from the distributable surplus, which may include a portion of the investor's capital (i.e. part of Sale Price (viz. price paid by the investor for purchase of Units) representing retained realized gains (equalisation reserve) in the Scheme books).

### Exit Load

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit Load. For instance if the NAV is Rs. 100 and the exit load is 1%, the investor will receive Rs. 99.

### Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

### Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

### Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

### Beta Ratio (Portfolio Beta)

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

### Average portfolio PE (Average P/E)

It is price to earnings ratio of the stocks calculated for the entire portfolio on a weighted average basis.

### Average portfolio price to book ratio (Average P/BV)

It is price to book value of the stocks calculated for the entire portfolio on a weighted average basis.

### Average portfolio dividend yield (Average Dividend Yield)

It is dividend yield of the stocks calculated for the entire portfolio on a weighted average basis.

### Net Equity

Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

### R Squared

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

### AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

### Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

### Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

### Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

### Important Note:

Housing Development Finance Corporation Limited (HDFC Ltd) has merged with HDFC Bank Limited w.e.f. July 1, 2023, consequently HDFC Bank Limited is now the Sponsor of HDFC Mutual Fund

## Macroeconomic Update

The month of August continued to witness evolving trade dynamics where the US maintained its assertive stance, implementing a new wave of tariffs effective August 7. While trade deals with the EU, Japan, and Indonesia were finalized, tariff-related uncertainty remained elevated with India being subject to much higher tariffs than other countries. Although US GDP growth for Q2 was revised upwards according to second revised estimates, underlying momentum has weakened as frontloaded exports unwound, and domestic demand softened. Labour data in US surprised on the downside raising hope for a rate cut in September. In China manufacturing PMI remained in contraction mode for fifth consecutive month as export orders continued to fall. New orders for businesses in the Eurozone increased for the first time since May-2024 helping business activity expand at its quickest pace in 15 months.

Inflation remained within a narrow range and largely on expected lines across most major economies. However, the impact of tariff pass through was visible in US inflation data. While the Fed is widely expected to cut rates in September following weaker than expected jobs report, ECB is expected to hold rates.

**Q1FY26 GDP growth higher than expected:** Q1FY26 GDP came in at 7.8% YoY which was higher than consensus expectation of 6.7% and RBI's estimate of 6.5%. On the supply side, the growth was driven by robust services and manufacturing sector activity. While growth in services sector was at a 9-quarter high, manufacturing sector clocked its best growth rate in last 5 quarters. On the demand side, growth was driven by overall consumption growth with Government consumption demand growing at 7.4% YoY in Q1 as against contraction in Q4FY25. Nominal GDP growth however decelerated to 8.8% YoY in Q1FY26 (as against 10.8% YoY in Q4FY25).

| YoY change (%)                | Q4FY25 | Q1FY26 | YoY change (%)                    | Q4FY25 | Q1FY26 |
|-------------------------------|--------|--------|-----------------------------------|--------|--------|
| <b>GDP</b>                    | 7.4    | 7.8    | <b>GVA</b>                        | 6.8    | 7.6    |

Source- MoSPI. Note- PADO: Public Administration and Defence

Going forward, growth is likely to face headwinds due to higher tariffs imposed by US on Indian imports. However, monetary stimulus and tax cuts (both personal income tax and GST cuts) are likely to cushion the impact on growth.

**Current account deficit (CAD) remains benign:** Q1FY26 CAD was recorded at 0.2% of GDP compared to a surplus of 1.3% of GDP in Q4FY25 as trade deficit in Q1 widened compared to Q4FY25. However, the CAD was lower when compared to Q1FY25. On the other hand, Capital account surplus declined from a year ago period but was higher than Q4FY25 on account of higher foreign investments (both FDI and FPI).

Going forward, current account is likely to face headwinds from higher tariff imposition by US on Indian imports but is likely to remain within manageable levels due to higher services exports and remittances.

| India's external situation (USD billion) | Q1FY25 | Q1FY26 | Change |
|------------------------------------------|--------|--------|--------|
| Trade surplus/(deficit)                  | -63.8  | -68.5  | -4.7   |

Source: RBI

**High frequency indicators suggest uptick in economic activity in Aug:** Pace of vehicle registrations except PVs witnessed improvement in August with tractors registrations growth touching multi-year high. Moreover, both manufacturing and services PMI showed robust business activity in the month of August and power demand showed improvement for second month in a row. However, gross GST collections moderated, and growth has been sub-par for third month in a row.

Source: [www.gstn.org.in](http://www.gstn.org.in), [www.icegate.gov.in](http://www.icegate.gov.in), CMIE, PIB, RBI, [www.vaahan.parivahan.gov.in](http://www.vaahan.parivahan.gov.in), [www.posoco.in](http://www.posoco.in)

^Number >50 reflects expansions and number <50 reflects contraction compared to previous month. @ - figures are preliminary data and are subject to revision. \* based on CMIE survey

Going forward, urban demand is likely to get a boost from income and proposed GST tax relief and easing monetary conditions while rural demand too is likely to remain steady on back of strong rabi output and prospects of above normal monsoon. However, global trade uncertainties and higher US tariff on Indian imports are likely to hurt growth in the near term.

**Income tax collections under pressure:** Gross tax revenue growth in the first four months of this fiscal has been sluggish driven by poor growth in direct tax collections as personal income tax growth has contracted 10% YoY even as corporate tax growth has been decent. Total expenditure growth in first 4 months of this fiscal has been strong as Government front loaded expenditure in the first quarter. Consequently, fiscal deficit has widened in the first 4 months when compared to the same period last year.

| INR bn                         | 4MFY25        | 4MFY26        | YoY growth  |

Source: CMIE

**Trade deficit widened in July:** Merchandise trade widened in Jul'25 compared to the previous month led mainly by widening of non-oil, non-gold (NONG). Net oil and net gold imports deficit too were higher compared to the previous month.

| Amount in USD billion    | Jun-25 | Jul-25 | Change |
|--------------------------|--------|--------|--------|
| Trade Deficit/ (Surplus) | 18.8   | 27.4   | 8.6    |
| Net Oil Imports          | 9.2    | 11.2   | 2.1    |
| Net Gold Imports*        | 1.8    | 3.8    | 2.1    |
| NONG net imports^        | 7.8    | 12.3   | 4.5    |

Source: CMIE, Ministry of Commerce; \*Net Gold includes gold, silver and pearls precious & semiprecious stones adjusted for gems and jewellery exports. ^NONG refers to Non-Oil Non-Gold (as defined above) imports/exports

The trade deficit is likely to face headwinds due to higher tariff imposition. However, healthy growth in services exports is likely to keep current account within manageable range.

**Retail inflation in Jul lowest since Jul-2017:** India's CPI inflation in July was recorded at its lowest level since Jul'17 driven by further moderation in food prices and favourable base. Core-Core (which excludes food, fuel, petrol, diesel, gold, silver and housing) also declined by 20bps.

| YoY, %                         | Jun-25 | Jul-25 | Change in % |
|--------------------------------|--------|--------|-------------|
| CPI                            | 2.1    | 1.6    | -0.5        |
| Food & beverages               | -0.2   | -0.8   | -0.7        |
| Fuel and Light                 | 2.6    | 2.7    | 0.1         |
| Housing                        | 3.2    | 3.2    | 0.0         |
| Transportation & communication | 3.9    | 2.1    | -1.8        |
| Core-Core CPI*                 | 4.9    | 4.7    | -0.2        |

Source: CMIE; @-CPI excluding food, fuel, petrol, diesel, gold, silver and housing

CPI inflation is likely to remain below 4% in the coming months due to favourable outlook on food inflation and favourable base effect.

**Commodity prices:** Oil prices decreased during the month following OPEC announcement to increase oil supply. Industrial metals such as steel, aluminium, and copper witnessed a modest recovery in Aug '25 as Chinese restrictions on production have reduced supply.

|                          | Market price (USD)* | Aug'25 (%) ^ | FY26TD (%) * |
|--------------------------|---------------------|--------------|--------------|
| Brent Crude (Per barrel) | 68.1                | (6.1)        | (8.9)        |
| Gold (per ounce)         | 3,448.0             | 4.8          | 10.4         |

## Summary and Conclusion

Global growth prospects today face unprecedented uncertainty due to US' tariff policy. US growth is exhibiting early signs of slowdown with softness in labour market now visible in data. This is likely to deteriorate going forward as effects of tariffs and uncertainty weigh on prospects. Domestic demand in China remains subdued and deflationary forces have gathered steam. Global growth prospects will depend on how imposition of higher tariffs by US plays out in the medium term.

India's growth momentum is exhibiting signs of resilience as evident from strong Q1 GDP data and recent high frequency indicators. However, as India faces one of the highest tariffs by US on its imports, growth is likely to take a hit in the second half of this fiscal. The Government has realised this and has embarked on major reform overhaul for the country starting with lowering of GST rates to boost consumption. Going forward urban consumption is likely to get a boost due to income tax relief and GST rate cuts announced by the Government and monetary easing by the RBI. Rural consumption too is likely to remain steady on the back of prospects of above normal monsoon, falling inflation and higher real rural wage growth. India's external sector also remains comfortable on the back of low current account deficit and adequate forex reserves. Rise in geopolitical tensions and a tariff related uncertainty are key near-term risks.

Looking ahead, the medium-term outlook for India's economy seems optimistic, in our view. This optimism is driven by bi-lateral trade deals with various countries, Governments renewed efforts for structural reforms, enhanced infrastructure investments, and the likely boost to private consumption.

## Debt Market Update

10-year benchmark Gsec yield rose ~20bps to 6.57% in August and touched intra month high of 6.6% due to fear of fiscal slippage as personal income tax collections in the first 4 months of this fiscal has contracted 10% YoY. Yields on corporate bonds too rose by ~18bps during the month leading to minor compression between 10-year corporate bonds and 10-year G-sec by ~2bps. Key events / news which influenced yields during the month are RBI's monetary policy signalling a pause in policy rate cycle and US announcing that India will face 50% tariff which is one of the highest in the world. The table below gives a summary view of the movement of key rates and liquidity:

|                                                              | Jul-25 | Aug-25 | Change (in bps) |
|--------------------------------------------------------------|--------|--------|-----------------|
| MIBOR Overnight Rate (%)                                     | 5.54   | 5.54   | -               |
| 3M Gsec yield (%)                                            | 5.40   | 5.51   | 0.11            |
| 10Yr Benchmark G-Sec Yield^ (%)                              | 6.37   | 6.57   | 0.20            |
| AAA 10Year Corporate Bond Yields* (%)                        | 7.00   | 7.18   | 0.18            |
| AAA 10Y Corporate bond spread against 10Y benchmark* (bps)   | 63     | 61     | -2              |
| Average net liquidity absorbed/infused by RBI* (INR billion) | 3,043  | 3,966  |                 |

\*Average net daily liquidity infused / absorbed through Liquidity Adjustment Facility, exports refinance, marginal standing facility and term repos/reverse repos. Source: Bloomberg, RBI

Average net liquidity surplus increased to INR ~3.9trn at the end of August compared to a surplus of INR ~3trn in July as measures taken by the RBI continued to show effect.

In the debt market, FPIs ended the month with net buying of USD 1.7 billion in August 2025 (July 2025 net buy: USD 120 million).

The S&P upgraded India's long-term sovereign credit rating to 'BBB' from 'BBB-', with the short-term rating upgraded to 'A-2' from 'A-3'. S&P noted India's robust and sustained economic growth (driven by high infrastructure investment), sound fiscal management, and a strengthened monetary policy framework that keeps inflation under control as reasons for this upgrade.

Key highlights from rating upgrade report:

- S&P projects annual GDP growth of **6.8%** over the next three years, supporting a moderation in the government debt-to-GDP ratio.
- Government spending quality has improved, with a focus on infrastructure investment.
- Total public investment in infrastructure, including state governments, is estimated at **around 5.5% of GDP**, matching or exceeding many peer countries.
- Monetary policy reforms, particularly the **shift to inflation targeting**, have stabilised price expectations.

Overall, the rating upgrade is positive from the perspective of faith in India's long term growth trajectory and likely to increase flows into Indian debt markets.

## Discussion paper on review of monetary policy framework

The RBI also floated a discussion paper to review the Monetary Policy Framework and has invited comments from the public on the same by September 18, 2025. The paper has lauded the flexible inflation targeting (FIT) regime and the choice of nominal anchor which is the headline CPI and has concluded that the present FIT has worked well for India. The RBI is likely to retain the current inflation targeting regime.

## Limited fiscal impact of proposed GST cuts

In a unanimous decision the GST Council decided to do away with 12% and 28% slabs leaving only 2 slabs of 5% and 18% with an additional 40% for sin/demerit goods. This is likely to have a limited fiscal impact according to the Government. Based on FY24 consumption data, the Government has estimated gross revenue loss of Rs930bn. The Government is also likely to gain Rs450bn due to items moving to the higher tax bracket of 40%. Therefore, the net loss from reduction in GST rates in Rs480bn or 0.16% of GDP.

## Outlook

RBI action to ease liquidity conditions through a host of measures (OMO purchases, currency swaps, VRRs, CRR cut) since December 2024 and higher than expected dividend transfer to Government is likely to keep liquidity in ample surplus in the coming months. The Government stuck to its fiscal consolidation path which is also positive from the debt market perspective.

As highlighted by RBI, CPI inflation is likely to remain below RBI's mid-point target of 4% in FY26 but rise to 4.9% by Q1FY27. In our view, in case the incoming data surprises on the downside due to global trade uncertainties, RBI could lower policy rate further as the neutral stance provides RBI with flexibility to move in either direction.

In our view, medium term outlook on Indian fixed income market remains favourable, considering:

- Headline CPI inflation is likely to undershoot RBI target of 4% in FY26. Thereafter, the rise due to unfavourable base is likely to be contained.
- S&P has upgraded India's long-term sovereign credit rating to BBB from BBB-
- Liquidity is likely to be in ample surplus given RBI's past actions and CRR cut effective later during the year
- External sector could remain comfortable in view of steady growth in services exports, decline in oil prices and adequate foreign exchange reserves.
- Higher tariff on India likely to dampen growth to the extent of 20-40bps based on most estimates

Key risk to the favourable outlook

- Weather disruptions may lead to rise in food prices

Overall, in our view, yields are likely to remain rangebound with a downward bias.

Falling inflation and front loading of policy rate cuts is positive from yields perspective. Thus, in view of significant liquidity provision, convergence of short-term rates and attractive corporate bonds spreads (over Gsec), one may consider investment in medium duration (schemes with duration of upto 5 years) categories especially corporate bonds focussed funds in line with individual risk appetite.

Further, as long bond spreads have widened over 10 year G-secs, investors with a relatively longer investment horizon could continue with their allocation to longer duration funds in line with individual risk appetite.

## Equity Market Update

The month of August 2025 saw broad based decline for Indian equity markets. While NIFTY 50 / BSE Sensex Index ended the month with 1.4% and 1.7% decline respectively, small and mid-cap indices witnessed a sharper fall. All sectors ended the month with decline except Autos and FMCG which ended the month with gain owing to proposed GST rate cuts on several staples and discretionary consumption items. India being subject to one of the highest tariffs in the world by US weighed on market sentiments during the month.

## Market Review

On the contrary, most global equity markets witnessed rally in August except for German, French and Korean markets. Below are detailed tables outlining the performance of key domestic and global indices:

| % Change in Indices            | Aug-25 | FY26TD* |
|--------------------------------|--------|---------|
| BSE Auto                       | 5.8    | 17.3    |
| BSE Fast Moving Consumer Goods | 0.2    | 6.0     |
| BSE Information Technology     | -1.1   | -4.7    |
| BSE Metal                      | -1.6   | -1.4    |
| BSE Bankex                     | -3.3   | 0.8     |
| BSE Healthcare                 | -3.9   | 5.3     |
| BSE Capital Goods              | -4.1   | 4.3     |
| BSE Power                      | -4.6   | -3.0    |
| BSE Oil & Gas                  | -4.7   | 1.6     |
| NSE Nifty 50 Index             | -1.4   | 3.9     |
| BSE Sensex                     | -1.7   | 3.1     |
| NIFTY Midcap 100               | -2.9   | 7.8     |
| NIFTY Smallcap 100             | -4.1   | 7.0     |

FIIs sold net equities worth USD 4.3 billion in August 2025 (July 2025: Net sold USD 2.9 billion) and have cumulatively sold equity worth USD 1.8 billion in 5MFY26 (5MFY25: Net bought USD 3.7 billion).

DIIs bought net equity worth USD 10.8 billion in August 2025 (July 2025: USD 7.1 billion) and have cumulatively bought USD 37.6 billion in 5MFY26 (5MFY25: USD 24 billion). Net flows into Mutual funds were ~INR 50,853 crore in July 2025 (June 2025: ~INR 28,170 crore & July 2024: ~INR 40,966 crore) cumulatively amounted to ~INR 126,817 crore in 4MFY26 (4MFY25: ~INR 144,916 crore).

### Outlook

As on August 31, 2025, NIFTY 50 Index was trading at ~20x price to earnings multiple. Further, Market cap-to-GDP stood ~115% (based on CY26 GDP estimates) and the gap between 10Y G-sec yield and 1Y-Forward NIFTY 50 Index earnings yield has narrowed recently [ $\text{Earnings yield} = 1 / (\text{one year forward P/E})$ ].

Source: Kotak Institutional Equities; For 2025 and 2026, the market cap as on August 31, 2025 is taken and divided by GDP estimates for CY25/CY26

As of August 31<sup>st</sup>, 2025, the valuations of all sectors except private banks and Tech are trading at a premium to historical average (refer to the table below for details):

Given the global uncertainties and aggregate valuation being higher than historical average, the importance of stock selection increases even more.

Over medium to long term, we remain optimistic on Indian equities considering strong macroeconomic fundamentals, attractive domestic growth outlook, healthy corporate profitability, and supportive pro-growth policies like income tax and GST relief to consumers. However, near-term risks include higher tariff imposition by US on India and cyclical moderation in corporate earnings.

### GOAL BASED SOLUTIONS

|                            |                                                                                                                                                                                                               |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>WEALTH CREATION</b>     | These schemes aim to increase wealth over the long term by investing predominantly in equity instruments and are suitable for investors with high risk appetite and relatively higher investment horizon.     |
| <b>TAX SAVINGS</b>         | This scheme is eligible to provide tax deduction under Section 80C and also aims to increase wealth over the long term. This is an ideal solution for investors who would like to create wealth and save tax. |
| <b>CHILDREN'S FUTURE</b>   | This scheme aims to help you achieve your specific financial goal of planning for child's future expenses like higher education, etc.                                                                         |
| <b>RETIREMENT PLANNING</b> | These schemes aim to help you achieve your specific financial goal of retirement planning.                                                                                                                    |
| <b>INCOME SOLUTIONS</b>    | These schemes aim to provide stable income and are ideal for investors with low to medium risk appetite who wish to receive regular income to meet their periodic expenses.                                   |

**Disclaimer:** Investors are requested to note that the above goal based solutions should not be construed as financial planning solution/recommendation by the Fund/ AMC. It does not in any manner, indicate or imply either the quality of any particular Scheme or guarantee any specific performance/returns. Such solutions must be tailored to investor's individual situation and objectives and therefore, investors should consult their financial advisors to ascertain whether a product is suitable for them.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

| Jan 01, 95 | Since Inception | 18.79              | 12.37                  | 11.64                               | 1,970,161                  | 357,994        | 293,520                     |

Returns greater than 1 year period are compounded annualized (CAGR) For performance of other schemes managed by Rishi Jain, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110. As NIFTY 50 TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of NIFTY 50 PRI values from January 1, 1995 to June 29, 1999 and TRI values since June 30, 1999.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

# HDFC Multi Cap Fund

An open ended equity scheme investing across large cap, mid cap & small cap stocks

CATEGORY OF SCHEME  
MULTI CAP FUND

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Gopal Agrawal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). For performance of other schemes managed by Rahul Baijal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

<sup>^</sup>Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Chirag Setalvad, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Chirag Setalvad, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

# HDFC Large and Mid Cap Fund

An open ended equity scheme investing in both large cap and mid cap stocks

CATEGORY OF SCHEME  
LARGE & MID CAP FUND

**INVESTMENT OBJECTIVE:** To generate long term capital appreciation/income from a portfolio, predominantly invested in equity and equity related instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. The Scheme, formerly a large cap fund, has undergone change in Fundamental attributes w.e.f. May 23, 2018 and become a Large and Mid-cap Fund. Accordingly, the Scheme's benchmark has also changed. HDFC Growth Opportunities Fund has been renamed as HDFC Large and Mid Cap Fund w.e.f. June 28, 2021. Hence, the past performance of the Scheme may not strictly be comparable with that of the new benchmark. As BSE SENSEX TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of BSE SENSEX PRI values from February 18, 1994 to August 18, 1996 and TRI values since August 19, 1996. \$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). For performance of other schemes managed by Gopal Agrawal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Value Fund

(Name changed from HDFC Capital Builder Value Fund w.e.f. March 15, 2025) An open ended equity scheme following a value investment strategy (This is a simple and performing scheme which is eligible for distribution by new cadre of distributors)

CATEGORY OF SCHEME  
VALUE FUND

**INVESTMENT OBJECTIVE:** To achieve capital appreciation/income in the long term by primarily investing in undervalued stocks. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Anand Laddha, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110. As NIFTY 50 TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of NIFTY 50 PRI values from February 1, 1994 to June 29, 1999 and TRI values since June 30, 1999.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Dividend Yield Fund

An open ended equity scheme predominantly investing in dividend yielding stocks (This is a simple and performing scheme which is eligible for distribution by new cadre of distributors)

CATEGORY OF SCHEME  
DIVIDEND YIELD FUND

**INVESTMENT OBJECTIVE:** To provide capital appreciation and/or dividend distribution by predominantly investing in a well-diversified portfolio of equity and equity related instruments of dividend yielding companies. There is no assurance that the investment objective of the Scheme will be achieved.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Gopal Agrawal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

# HDFC Focused Fund

(Name changed from HDFC Focused 30 Fund w.e.f. June 27, 2025) An open ended equity scheme investing in maximum 30 stocks in large-cap, mid-cap and small-cap category (i.e. Multi-Cap)

CATEGORY OF SCHEME  
FOCUSED FUND

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR) For performance of other schemes managed by Roshi Jain, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

\*Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Business Cycle Fund

An open ended equity scheme following business cycle based investing theme

CATEGORY OF SCHEME  
THEMATIC FUND

**INVESTMENT OBJECTIVE:** To provide long-term capital appreciation by investing predominantly in equity and equity related securities with a focus on riding business cycles through dynamic allocation between various sectors and stocks at different stages of business cycles. There is no assurance that the investment objective of the Scheme will be achieved.

# HDFC Business Cycle Fund

An open ended equity scheme following business cycle based investing theme

....Contd from previous page  
CATEGORY OF SCHEME  
THEMATIC FUND

## Industry Allocation of Equity Holding (% of Net Assets)

### SIP PERFORMANCE ^ - Regular Plan - Growth Option

|                                                 | Since Inception SIP | 1 year SIP  |
|-------------------------------------------------|---------------------|-------------|
| Total Amount Invested (₹. in Lacs)              | 3.40                | 1.20        |
| Market Value as on August 29, 2025 (₹. in Lacs) | 4.04                | 1.23        |
| <b>Returns (%)</b>                              | <b>12.39</b>        | <b>4.65</b> |
| Benchmark Returns (%)#                          | 13.13               | 1.81        |
| Additional Benchmark Returns (%)# #             | 11.13               | 3.29        |

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Rahul Baijal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

## SIP PERFORMANCE <sup>^</sup> - Regular Plan - Growth Option

|                                                 | Since Inception SIP | 1 year SIP   |
|-------------------------------------------------|---------------------|--------------|
| Total Amount Invested (₹. in Lacs)              | 2.50                | 1.20         |
| Market Value as on August 29, 2025 (₹. in Lacs) | 3.19                | 1.37         |
| <b>Returns (%)</b>                              | <b>24.61</b>        | <b>26.86</b> |
| Benchmark Returns (%)#                          | 19.01               | 16.43        |
| Additional Benchmark Returns (%)# #             | 8.54                | 3.29         |

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Priya Ranjan, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Priya Ranjan and Rahul Bajjal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Anand Laddha, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

<sup>^</sup>Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Balakumar B, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

# HDFC Pharma and Healthcare Fund

An open-ended equity scheme investing in Pharma and healthcare companies

CATEGORY OF SCHEME  
SECTORAL FUND

**INVESTMENT OBJECTIVE:** To provide long-term capital appreciation by investing predominantly in equity and equity related securities of Pharma and healthcare companies. There is no assurance that the investment objective of the Scheme will be achieved.

## SIP PERFORMANCE ^ - Regular Plan - Growth Option

|                                                 | Since Inception SIP | 1 year SIP   |
|-------------------------------------------------|---------------------|--------------|
| Total Amount Invested (₹. in Lacs)              | 2.30                | 1.20         |
| Market Value as on August 29, 2025 (₹. in Lacs) | 2.85                | 1.26         |
| <b>Returns (%)</b>                              | <b>23.21</b>        | <b>10.22</b> |
| Benchmark Returns (%)#                          | <b>16.54</b>        | <b>4.15</b>  |
| Additional Benchmark Returns (%)##              | <b>7.63</b>         | <b>3.29</b>  |

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

| Oct 04, 23 | Since Inception | 32.26              | 26.92                  | 14.19                              | 17,029                     | 15,743         | 12,875                     |

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Nikhil Mathur, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Housing Opportunities Fund

An open ended equity scheme following housing and allied activities theme

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Srinivasan Ramamurthy, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Infrastructure Fund

An open ended equity scheme following infrastructure theme

CATEGORY OF SCHEME  
THEMATIC FUND

**INVESTMENT OBJECTIVE:** To seek long-term capital appreciation/income by investing predominantly in equity and equity related securities of companies engaged in or expected to benefit from the growth and development of infrastructure. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Srinivasan Ramamurthy, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

# HDFC MNC Fund

An open ended equity scheme following multinational company (MNC) theme

CATEGORY OF SCHEME  
THEMATIC FUND

**INVESTMENT OBJECTIVE:** To provide long-term capital appreciation by investing predominantly in equity and equity related instruments of multinational companies (MNCs). There is no assurance that the investment objective of the Scheme will be achieved.

| Additional Benchmark Returns (%)##              | <b>10.63</b>        | <b>3.29</b> |

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

| Mar 09, 23 | Since Inception | 12.32              | 20.06                  | 15.66                              | 13,334                     | 15,728         | 14,339                     |

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Rahul Bajjal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

## SIP PERFORMANCE ^ - Regular Plan - Growth Option

|                                                 | Since Inception SIP | 1 year SIP  |
|-------------------------------------------------|---------------------|-------------|
| Total Amount Invested (₹. in Lacs)              | 2.60                | 1.20        |
| Market Value as on August 29, 2025 (₹. in Lacs) | 3.05                | 1.26        |
| <b>Returns (%)</b>                              | <b>14.88</b>        | <b>8.86</b> |
| Benchmark Returns (%)#                          | 16.19               | 11.27       |
| Additional Benchmark Returns (%)# #             | 8.80                | 3.29        |

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Amit Sinha, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

For Product label and Riskometers, refer page no: 113-126

# HDFC Manufacturing Fund

An open-ended equity scheme following manufacturing theme

CATEGORY OF SCHEME  
THEMATIC FUND

**INVESTMENT OBJECTIVE:** To provide long-term capital appreciation by investing predominantly in equity and equity related securities of companies engaged in the manufacturing activity. There is no assurance that the investment objective of the Scheme will be achieved.

## SIP PERFORMANCE ^ - Regular Plan - Growth Option

|                                                 | Since Inception SIP | 1 year SIP  |
|-------------------------------------------------|---------------------|-------------|
| Total Amount Invested (₹. in Lacs)              | 1.60                | 1.20        |
| Market Value as on August 29, 2025 (₹. in Lacs) | 1.64                | 1.24        |
| <b>Returns (%)</b>                              | <b>4.00</b>         | <b>6.67</b> |
| Benchmark Returns (%)#                          | 3.41                | 5.58        |
| Additional Benchmark Returns (%)# #             | 3.65                | 3.29        |

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

## PERFORMANCE ^ - Regular Plan - Growth Option

| Date       | Period          | Scheme Returns (%) | Benchmark Returns (%)# | Additional Benchmark Returns (%)## | Value of ₹ 10,000 invested |                |                            |
|------------|-----------------|--------------------|------------------------|------------------------------------|----------------------------|----------------|----------------------------|
|            |                 |                    |                        |                                    | Scheme (₹)                 | Benchmark (₹)# | Additional Benchmark (₹)## |
| Aug 30, 24 | Last 1 Year     | -4.77              | -5.50                  | -2.01                              | 9,524                      | 9,451          | 9,800                      |
| May 16, 24 | Since Inception | 5.10               | 5.83                   | 8.51                               | 10,661                     | 10,757         | 11,108                     |

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Rakesh Sethia, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of balanced nature of the scheme where a portion of scheme's investments are made in debt instruments. \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). As NIFTY 50 TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of NIFTY 50 PRI values from February 1, 1994 to June 29, 1999 and TRI values since June 30, 1999. For performance of other schemes managed by Gopal Agrawal, Srinivasan Ramamurthy, Arun Agarwal, Nandita Menezes & Anil Bamboli, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

**Note:** @@Effective close of business hours of June 1, 2018, HDFC Prudence Fund merged with HDFC Growth Fund (HDFC Balanced Advantage Fund after changes in fundamental attributes). As the portfolio characteristics and the broad investment strategy of HDFC Balanced Advantage Fund is similar to that of erstwhile HDFC Prudence Fund, the track record (i.e. since inception date, dividend history, etc.) and past performance of erstwhile HDFC Prudence Fund has been considered, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Hybrid Equity Fund

An open ended hybrid scheme investing predominantly in equity and equity related instruments

CATEGORY OF SCHEME  
AGGRESSIVE HYBRID FUND

**INVESTMENT OBJECTIVE:** The investment objective of the Scheme is to generate capital appreciation / income from a portfolio, predominantly of equity & equity related instruments. The Scheme will also invest in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments. For performance of other schemes managed by Anupam Joshi & Srinivasan Ramamurthy, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Note: @@ Effective close of business hours of June 1, 2018, HDFC Balanced Fund merged with HDFC Premier Multi Cap Fund (HDFC Hybrid Equity Fund after changes in fundamental attributes). As the portfolio characteristics and the broad investment strategy of HDFC Hybrid Equity Fund is similar to that of erstwhile HDFC Balanced Fund, the track record (i.e. since inception date, dividend history, etc) and past performance of erstwhile HDFC Balanced Fund has been considered, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Multi-Asset Fund

An open ended scheme investing in Equity and Equity related instruments, Debt & Money Market Instruments and Gold related instruments

CATEGORY OF SCHEME  
MULTI ASSET ALLOCATION FUND

**INVESTMENT OBJECTIVE:** To generate long term capital appreciation/income by investing in a diversified portfolio of equity & equity related instruments, debt & money market instruments and Gold related instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes w.e.f. May 23, 2018 and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark has also changed. Hence, the performance of the Scheme from inception till May 22, 2018 may not strictly be comparable with those of the new benchmark and the additional benchmark. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Anil Bamboli, Bhagyesh Kagalkar, Arun Agarwal & Nandita Menezes, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Multi-Asset Active FOF

(Name changed from HDFC Asset Allocator Fund of Funds w.e.f. May 02, 2025) An open ended Fund of Funds scheme investing in equity oriented, debt oriented and gold ETFs schemes

CATEGORY OF SCHEME  
FUND OF FUNDS

**INVESTMENT OBJECTIVE:** To seek capital appreciation by managing the asset allocation between equity oriented, debt oriented and gold ETF schemes. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark, since a portion of scheme's investments are made in debt instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Anil Bamoli, Arun Agarwal & Nandita Menezes, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110. @@Effective December 16, 2015, certain changes, including changes to fundamental attributes, were effected in the erstwhile HDFC Multiple Yield Fund, (an open ended income scheme) which was renamed as HDFC Equity Savings Fund, an open ended equity scheme. On account of these changes, the performance during the period(s) from September 17, 2004 to December 15, 2015 is not comparable.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Hybrid Debt Fund

An open ended hybrid scheme investing predominantly in debt instruments

CATEGORY OF SCHEME  
CONSERVATIVE HYBRID FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation by investing primarily in debt securities, money market instruments and moderate exposure to equities. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in equity instruments. For performance of other schemes managed by Srinivasan Ramamurthy & Shobhit Mehrotra, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**Note:** Effective close of business hours of May 25, 2018, HDFC MF Monthly Income Plan - Long Term Plan (MIP-LTP) underwent changes in Fundamental Attributes and was renamed as HDFC Hybrid Debt Fund (HHDF) and HDFC MF Monthly Income Plan - Short Term Plan was merged therein. As the portfolio structuring of HHDF closely resembles the erstwhile MIP-LTP, the past performance of MIP-LTP is provided, in line with SEBI circular on Performance disclosure post consolidation/merger of scheme dated April 12, 2018.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC ELSS Tax saver

Name changed from HDFC TaxSaver An open ended equity linked savings scheme with a statutory lock in of 3 years and tax benefit (This is a simple and performing scheme which is eligible for distribution by new cadre of distributors)

CATEGORY OF SCHEME  
EQUITY LINKED SAVINGS SCHEME

**INVESTMENT OBJECTIVE:** To generate capital appreciation / income from a portfolio, comprising predominantly of equity & equity related instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR) \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). For performance of other schemes managed by Roshni Jain, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110. As TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of NIFTY 50 TRI values from Mar 29, 96 (Data for March 31, 96 is not available) to Jun 29, 99 and TRI values since Jun 30, 99. As NIFTY 500 TRI data is not available for March 31, 96, benchmark performance is calculated from

March 29, 96.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Children's Fund

An open ended fund for investment for children having a lock-in for atleast 5 years or till the child attains age of majority (whichever is earlier) ☐

CATEGORY OF SCHEME  
CHILDREN'S FUND

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of balanced nature of the scheme where a portion of scheme's investments are made in debt instruments. \$ Adjusted for Bonus units declared under the Scheme. For performance of other schemes managed by Chirag Setalvad & Anil Bamoli, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Retirement Savings Fund - Equity Plan

A notified Tax Savings Cum Pension Scheme An open ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)

CATEGORY OF SCHEME  
RETIREMENT FUND

**INVESTMENT OBJECTIVE:** The investment objective of the Investment Plans under the Scheme is to provide long-term capital appreciation / income by investing in a mix of equity and debt instruments to help investors meet their retirement goals. There is no assurance that the investment objective of the Scheme will be achieved.

# HDFC Retirement Savings Fund - Equity Plan

A notified Tax Savings Cum Pension Scheme An open ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)

....Contd from previous page

CATEGORY OF SCHEME  
RETIREMENT FUND

## EXIT LOAD\$\$

**Existing investments by investors including SIP / STP registrations, etc (until June 1, 2018): Exit Load** (Upon completion of lock-in period of 5 years)

In respect of each purchase/switch-in of units offered under the respective Investment Plan(s):-

- An Exit Load of 1% is payable if Units are redeemed/ switched-out before completion of 60 years of age
- No Exit Load is payable if Units are redeemed / switched-out on or after attainment of 60 years of age.

Fresh investments by investors including SIP / STP registrations, etc (effective June 2, 2018): Exit Load (Upon completion of lock-in period) Nil

Note: No Exit Load shall be imposed for switching between Investment Plan(s) and Plans/Options within the Investment Plan(s), subject to completion of lock-in period.

Investors are requested to note that Switch is treated as redemption and entails tax consequences.

## Industry Allocation of Equity Holding (% of Net Assets)

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Srinivasan Ramamurthy, Shobhit Mehrotra, Nandita Menezes and Arun Agarwal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Retirement Savings Fund - Hybrid Equity Plan

A notified Tax Savings Cum Pension Scheme An open ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)

CATEGORY OF SCHEME  
RETIREMENT FUND

**INVESTMENT OBJECTIVE:** The investment objective of the Investment Plans under the Scheme is to provide long-term capital appreciation / income by investing in a mix of equity and debt instruments to help investors meet their retirement goals. There is no assurance that the investment objective of the Scheme will be achieved.

Returns greater than 1 year period are compounded annualized (CAGR). Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Shobhit Mehrotra, Nandita Menezes and Arun Agarwal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Retirement Savings Fund - Hybrid Debt Plan

A notified Tax Savings Cum Pension Scheme [An open ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)]

CATEGORY OF SCHEME  
RETIREMENT FUND

**INVESTMENT OBJECTIVE:** The investment objective of the Scheme is to provide long term capital appreciation/income by investing in a mix of equity and debt instruments to help investors meet their retirement goals. There is no assurance that the investment objective of the Scheme will be achieved.

# HDFC Retirement Savings Fund - Hybrid Debt Plan

A notified Tax Savings Cum Pension Scheme [An open ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier)]

....Contd from previous page

CATEGORY OF SCHEME  
RETIREMENT FUND

## EXIT LOADS

**Existing investments by investors including SIP / STP registrations, etc (until June 1, 2018): Exit Load** (Upon completion of lock-in period of 5 years) In respect of each purchase/switch-in of units offered under the respective Investment Plan(s):-

- An Exit Load of 1% is payable if Units are redeemed/ switched-out before completion of 60 years of age
- No Exit Load is payable if Units are redeemed / switched-out on or after attainment of 60 years of age.

**Fresh investments by investors including SIP / STP registrations, etc (effective June 2, 2018): Exit Load** (Upon completion of lock-in period) Nil

Note: No Exit Load shall be imposed for switching between Investment Plan(s) and Plans/Options within the Investment Plan(s), subject to completion of lock-in period. Investors are requested to note that Switch is treated as redemption and entails tax consequences.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in equity instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Shobhit Mehrotra, Nandita Menezes and Arun Agarwal, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

# HDFC Overnight Fund

An open ended debt scheme investing in overnight securities. A Relatively Low Interest Rate Risk and Relatively Low Credit Risk

CATEGORY OF SCHEME  
OVERNIGHT FUND

**INVESTMENT OBJECTIVE:** To generate returns by investing in debt and money market instruments with overnight maturity. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital. SIP facility in the Scheme has been made available from November 12, 2020.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital. SIP facility in the Scheme has been made available from November 12, 2020.

Returns less than 1 year period are simple annualized and greater than 1 year are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Anupam Joshi & Swapnil Jangam, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Anil Bamboli & Praveen Jain, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Low Duration Fund

An open ended low duration debt scheme investing in instruments such that the Macaulay Duration of the portfolio is between 6 months and 12 months (Refer page 2 for definition of Macaulay Duration). A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME  
LOW DURATION FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation through investment in debt securities and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Anupam Joshi & Praveen Jain, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Money Market Fund

An open ended debt scheme investing in money market instruments. A Relatively Low Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME  
MONEY MARKET FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation by investing in money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). For performance of other schemes managed by Praveen Jain, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Short Term Debt Fund

An open ended short term debt scheme investing in instruments such that the Macaulay Duration of the portfolio is between 1 year and 3 years (Refer page 2 for definition of Macaulay Duration). A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME  
SHORT DURATION FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation through investments in Debt and Money Market Instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Anil Bamboli, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Medium Term Debt Fund

An open ended medium term debt scheme investing in instruments such that the Macaulay Duration of the portfolio is between 3 years and 4 years (Refer page 2 for definition of Macaulay Duration). A Relatively High Interest Rate Risk and Relatively High Credit Risk

CATEGORY OF SCHEME  
MEDIUM DURATION FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation through investments in Debt and Money Market Instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Bhavyesh Divecha & Shobhit Mehrotra, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Income Fund

An open ended medium term debt scheme investing in instruments such that the Macaulay Duration of the Portfolio is between 4 years and 7 years (Refer page 2 for definition of Macaulay Duration). A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME  
MEDIUM TO LONG DURATION FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation through investments in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Shobhit Mehrotra, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**\*Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Long Duration Debt Fund

An open ended debt scheme investing in instruments such that the Macaulay Duration of the portfolio is greater than 7 years, A Relatively High Interest Rate Risk and Relatively Low Credit Risk

CATEGORY OF SCHEME  
LONG DURATION FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation through investments in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance is not strictly comparable with that of its Additional Benchmark since the scheme does not take directional call in equity markets but is limited to availing arbitrage opportunities, etc. For performance of other schemes managed by Arun Agarwal, Nandita Menezes & Anil Bamboli, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

# HDFC Floating Rate Debt Fund

An open ended debt scheme predominantly investing in floating rate instruments (including fixed rate instruments converted to floating rate exposures using swaps / derivatives) A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME  
FLOATER FUND

**INVESTMENT OBJECTIVE:** To generate income/capital appreciation through investment in a portfolio comprising substantially of floating rate debt, fixed rate debt instruments swapped for floating rate returns and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). Since inception returns are calculated on ₹ 13.1821 ( allotment price) For performance of other schemes managed by Shobhit Mehrotra, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Corporate Bond Fund

An open ended debt scheme predominantly investing in AA+ and above rated corporate bonds. A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME  
CORPORATE BOND FUND

**INVESTMENT OBJECTIVE:** To generate income/capital appreciation through investments predominantly in AA+ and above rated corporate bonds. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR) For performance of other schemes managed by Anupam Joshi, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**Note:** Effective close of business hours of May 8, 2018, HDFC Medium Term Opportunities Fund (HMTOF) underwent changes in Fundamental Attributes and was renamed as HDFC Corporate Bond Fund (HCBF) and HDFC Floating Rate Income Fund - Long Term Plan and HDFC Gilt Fund - Short Term Plan were merged therein. As the portfolio structuring of HCBF closely resembles the erstwhile HMTOF, the past performance of HMTOF is provided, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Banking and PSU Debt Fund

[An open ended debt scheme predominantly investing in debt instruments of banks, public sector undertakings, public financial institutions and municipal bonds. A Relatively High Interest Rate Risk and Moderate Credit Risk]

CATEGORY OF SCHEME  
BANKING AND PSU FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation through investments in debt and money market instruments consisting predominantly of securities issued by entities such as Scheduled Commercial Banks (SCBs), Public Sector undertakings (PSUs), Public Financial Institutions (PFIs), Municipal Corporations and such other bodies. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Anil Bamboli, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Credit Risk Debt Fund

An open ended debt scheme predominantly investing in AA and below rated corporate bonds (excluding AA+ rated corporate bonds) A Relatively High Interest Rate Risk and Relatively High Credit Risk

CATEGORY OF SCHEME  
CREDIT RISK FUND

**INVESTMENT OBJECTIVE:** To generate income/capital appreciation by investing predominantly in AA and below rated corporate debt. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Shobhit Mehrotra, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

**^Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Load is not taken into consideration for computation of performance.

**Note:** Effective close of business hours of May 8, 2018, HDFC Corporate Debt Opportunities Fund (HCDOF) underwent changes in Fundamental Attributes and was renamed as HDFC Credit Risk Debt Fund (HCRDF) and HDFC Regular Savings Fund was merged therein. As the portfolio structuring of HCRDF closely resembles the erstwhile HCDOF, the past performance of HCDOF is provided, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Dynamic Debt Fund

An open ended dynamic debt scheme investing across duration. A Relatively High Interest Rate Risk and Moderate Credit Risk

CATEGORY OF SCHEME  
DYNAMIC BOND FUND

**INVESTMENT OBJECTIVE:** To generate income / capital appreciation by investing in a range of debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Anil Bamboli, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

# HDFC Gilt Fund

An open ended debt scheme investing in government securities across maturities. A Relatively High Interest Rate Risk and Relatively Low Credit Risk

CATEGORY OF SCHEME  
GILT FUND

**INVESTMENT OBJECTIVE:** To generate credit risk-free returns through investments in sovereign securities issued by the Central Government and/ or State Government. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Anil Bamboli, please refer page 99. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 104 to 110.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

For performance details of Direct Plan, refer page 104 to 110

**\$\$ EXIT LOAD :** (i) No Exit Load shall be levied for switching between Plans / Options within the Scheme. However, exit load will be applicable if the units are switched-out / redeemed from the Scheme within the exit load period from the initial date of purchase. (ii) Switch of investments between Plans under a Scheme having separate portfolios, will be subject to applicable exit load. (iii) No exit load will be levied on Bonus Units and Units allotted on IDCW Re-investment. (iv) The exit load levied on redemption/switch-out will be the load prevailing 1. In case of lumpsum transactions, on the date of allotment of units 2. In case of Systematic Transactions such as SIP, STP etc., on the date of registration / enrolment

**Tax Benefits/Consequences:** For detailed information on tax benefits/consequences, refer to the Scheme Information Document available on [www.hdfcfund.com](http://www.hdfcfund.com)

**Investors should be aware that the fiscal rules / tax laws may change and there can be no guarantee that the current tax position may continue indefinitely. In view of individual nature of tax consequences, each investor is advised to consult his / her own professional tax advisor.**

**Applicability of Stamp Duty :** Effective July 1, 2020, in accordance with the amendment to the Indian Stamp Act, 1899, a stamp duty @ 0.005% of the transaction value would be levied on applicable mutual fund purchase transactions (including transactions carried through stock exchanges and depositories for units in demat mode). Thus, the number of units allotted on all the applicable mutual fund transactions would be reduced to the extent of levy of stamp duty.

Kindly refer to FAQs on Stamp Duty, for details on the nature of transactions and the rate of levy of stamp duty available on our website.

#Domestic Prices of physical Silver (derived as per regulatory norms).

Performance of close-ended schemes, being close-ended in nature, is not strictly comparable with that of open-ended schemes since the investment strategy for close-ended schemes is primarily buy and hold whereas open-ended schemes are actively managed.

**Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

## SCHEME PERFORMANCE - REGULAR PLAN - GROWTH OPTION (FUND MANAGER-WISE)

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

#Nifty LargeMidcap 250 Index (TRI) ##Nifty 50 Index (TRI). Simple annualized returns have been provided as per the extant guidelines since the scheme has completed 6 months but not 1 year. However, such returns may not be representative. Absolute returns of the Scheme for the 6 month period is 14.24%.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

| #Nifty100 Quality 30 Index (TRI) ##Nifty 50 Index (TRI). Simple annualized returns have been provided as per the extant guidelines since the scheme has completed 6 months but not 1 year. However, such returns may not be representative. Absolute returns of the Scheme for the 6 month period is 12.53%. |               |                    |                        |                                    |                           |                           |                  |

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

| #NIFTY LARGE - MIDCAP 250 Index (TRI) ##BSE SENSEX Index (TRI). The Scheme, formerly a large cap fund, has undergone change in Fundamental attributes and become a Large and Mid-cap Fund. Accordingly, the Scheme's benchmark has also changed. Hence, the past performance of the Scheme may not strictly be comparable with that of the new benchmark. |                 |                    |                        |                          |                           |                        |                           |          |

Performance of close-ended schemes, being close-ended in nature, is not strictly comparable with that of open-ended schemes since the investment strategy for close-ended schemes is primarily buy and hold whereas open-ended schemes are actively managed.

**Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

Performance of close-ended schemes, being close-ended in nature, is not strictly comparable with that of open-ended schemes since the investment strategy for close-ended schemes is primarily buy and hold whereas open-ended schemes are actively managed.

**Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

#65% Nifty 50 Index (TRI) + 25% NIFTY Composite Debt Index + 10% Price of Domestic Gold ##Nifty 50 Index (TRI). The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark and additional benchmarks have also changed. Hence, the past performance of the Scheme since inception till May 22, 2018 may not strictly be comparable with those of the new benchmark and the additional benchmark. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments.

#NIFTY 50 Arbitrage Index (Total Returns Index) ##CRISIL 1 Year T-Bill Index. Scheme performance is not strictly comparable with that of its Additional Benchmark since the scheme does not take directional call in equity markets but is limited to availing arbitrage opportunities, etc.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

## SCHEME PERFORMANCE - DIRECT PLAN - GROWTH OPTION (FUND MANAGER-WISE)

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns greater than 1 year period are compounded annualized (CAGR). Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. Load is not taken into consideration for computation of performance. N.A.: Not Available For Riskometer of the Schemes and Benchmark's, refer page 113 to 126.

<sup>^</sup> Past performance may or may not be sustained in future and is not a guarantee of any future returns. There is no assurance or guarantee to Unit holders as to rate/quantum of IDCW distribution nor that the IDCWs will be paid regularly. After payment of the IDCW, the per Unit NAV falls to the extent of the payout and statutory levvy, if any. Please log on to [www.hdfcfund.com](http://www.hdfcfund.com) for Record Date wise listing of IDCWs declared.
